# Mega Menu Extension For Magento2

Mega Menu Extension enable you to make effective mega menu with the various options of styling your menu. Mega menu module provides two display types of menu : horizontal and Vertical menu, and you can also add dynamic images, labels, icons on selected each menu item.

### **Installation Instructions**

1. Install using composer by adding to your composer file using commands:

- \$ composer require sprinix/module-megamenu
- \$ bin/magento setup:upgrade
- \$ bin/magento setup:di:compile
- 2. If you don't want to install via composer, you can use this way.
  - Download `Sprinix MegaMenu Extension.zip` file .
  - Extract `Sprinix MegaMenu Extension.zip` file to `app/code/Sprinix/MegaMenu` ; You should create a folder path `app/code/Sprinix/MegaMenu` if not exist.
  - Go to Magento root folder and run upgrade command line to install `Sprinix\_MegaMenu`:
  - i. php bin/magento setup:upgrade
  - ii. php bin/magento setup:di:compile

### Admin Store Configuration

- To Configure the Sprinix Mega Menu Extension for your stores follow the path given below STORES -> Configuration -> SPRINIX -> Mega Menu Configuration
- For the field, 'Module Enable', select Yes to enable the extension, if field is set to No then module will not active Mega Menu for the stores .
