•	admin admin Administrator	If you are running any type of website, you cannot just rely on visitors coming and leaving. You need to retain them, and that can often be accomplished by running specials or promos. Shopware 6 Top notification bar is a simple notification bar plugin that you can use to place a notification on the header of your website.		Ø

Now click on the Save button.

Customer View

Finally, the customers can see the notification is visible on all store pages.

After clicking on the notification a pop-up will appear as seen in the screenshot given below
